

Environmentally Preferred PRODUCT

We are committed to the development, sourcing and supply of Office Products and Supplies that have a **positive environmental influence.**

these are **products** that;

- contain post consumer materials
- products that can be reprocessed (recycled)
- products that are environmentally preferred because of an environmental benefit in their composition and/or method of creating them

Examples of **products** that are **preferred** due to an **environmental benefit:**

- water soluble inks
- non lacquered wood
- products that do not contain rainforest or ancient forest material
- energy efficient products

We have identified these products in this catalogue with the EPP symbol and created a separate listing of this product in the index of this catalogue.

Choose Recyclable product that meets your needs

Choose products that contain Post Consumer Waste

Definitions According to the Government of Canada Federal House In Order

Recyclable (recyclable)

Refers to such products as paper, glass, plastic, used oil, and metals that can be reprocessed instead of being disposed of as waste.

Post-Consumer Waste (PCW)

Material or item generated by households and commercial and institutional facilities, which has served its intended purpose and can no longer be used by the generator.
